

# INSTRUCTIONS FOR GROWING WHEATGRASS

# Maysajonu

**1**

Wash the wheat seeds thoroughly several times.

**2**

Place the washed seeds into a container and pour clean water over them. If available, add 1 tbsp of hydrogen peroxide.

**3**

Close the container lid and keep it in a dark place for 8 hours.

**4**

After 8 hours, rinse the seeds and pour fresh water. Close the container lid and keep it in a dark place for 8 hours.

**5**

After 8 hours, rinse the seeds and pour fresh water. Close the container lid and keep it in a dark place for 8 hours.

**6**

Put soil into the container and evenly place the wheat seeds that have been soaked for 24 hours on top.

## INSTRUCTIONS FOR GROWING WHEATGRASS

# Maysajonu

7

Spray water over the evenly spread seeds. Close the container lid and keep it in a dark place for 2-3 days.

8

Spray water several times a day. Do not allow the seeds to dry out.

9

When the wheat sprouts begin to turn green, place them in a bright location and continue spraying water daily.

10

If the wheatgrass grows taller than 9-10 cm, trim it with scissors.

11

You can add the cut grass to your pet's food.
